

Six Flags Great Adventure is looking to clear-cut 70 Acres of environmentally critical Pinelands forest adjacent to Colliers Mills Wildlife Management Area to build a SOLAR POWER PLANT!

The projected environmental impact is great: the destruction of an important ecosystem, **annihilation of 13 Rare wildlife species** and 1,500 common species, and disturbance and contamination of an important water recharge area.

(SOLAR) POWER PLANTS DON'T BELONG IN RESIDENTIAL NEIGHBORHOODS!

How can this affect our Properties and Neighborhood?

The risks to our neighborhoods include **FLOODING, SEPTIC SYSTEM FAILURE, ground water and WELL CONTAMINATION with heavy metals like LEAD and carcinogens like HEXAVALENT CHROMIUM, risks of CATASTROPHIC ELECTRICAL FIRE, "Heat Island" effect, property value loss and more.**

Go to www.JacksonCitizens.com to get more information about the risks, read studies and expert opinion.

LET'S NOT SIT BACK AND WATCH OUR NATURAL RESOURCES AND OUR COMMUNITY FALL VICTIM TO CORPORATE GREED!

Attend Jackson Planning Board Hearing on **Monday, March 21, at 7:30pm** at 95 West Veterans Highway. Be there so that you can hear expert testimony, ask questions, and voice your opinion. **YOUR PRESENCE MATTERS!**
